

HOPI EAR CANDLES

This is a modern version of an ancient treatment. Some of the candle ingredients are beeswax, honey extracts, sage & chamomile. The candles work on a chimney principle, drawing any impurities to the surface where they can be gently removed. They equalise the pressure in the head & ears, making them suitable for most conditions. Secretion flow is gently stimulated and the vapour collects and removes impurities or deposits. At Tao we offer a 30-minute treatment or a more relaxing 45-minute treatment to include pressure points drainage & massage. Consultation required with first visit.

HOT STONE MASSAGE THERAPY

Hot stone massage therapy melts away tension, eases muscle stiffness and increases circulation and metabolism. It will also promote deeper muscle relaxation through the placement of smooth, water-heated stones at key points on the body. Our professional massage therapists also incorporate a customized massage, with the use of hot stones which offers enhanced benefits.

The premise behind hot stone massage therapy is that the direct heat of the stones relaxes muscles, allowing the therapist access to their deeper muscle layers. Combining hot stone protocols with a full body massage provides a very healing and effective experience. The hot stones also expand blood vessels which encourage blood flow plus it has a sedative and de-stressing effect.

WE WOULD RECOMMEND THE 25 MINUTE MASSAGE OR 45 MINUTE HOT STONE TREATMENT FOR MEN AS THE THERAPISTS ARE NOT TRAINED IN DEEP SPORTS MASSAGE

Using a spray tanning system, our trained beauty therapists spray a fine mist of bronzing solution over the entire body giving an even, streak less, natural-looking tan. Depending on the depth of tan required we have a variety of mist options. The therapist will advise you on the best choice on the day.
